

Protect Your Business. Simplify PCI Compliance.

We make PCI compliance easy—so you can focus on running your business, not worrying about data security.

What is PCI Compliance?

PCI DSS stands for **Payment Card Industry Data Security Standard**.

It's a global set of requirements designed to protect credit card data and help businesses like yours safely accept card payments.

Every business that processes credit cards—regardless of size or volume—is required to comply. Whether you run payments through a terminal, online, or over the phone, PCI applies.

Why It Matters

PCI Compliance helps protect your business and your customers by:

- **Reducing the risk** of data breaches
- Ensuring sensitive customer data **stays safe**
- **Avoiding costly fines**, penalties, and monthly non-compliance fees
- 60% of small businesses **close within 6 months** of a data breach
- The average cost per compromised card is **over \$200**

The Basys Difference

With most processors, PCI is an afterthought. You're left on your own to figure it out. Or worse, charged monthly non-compliance fees with no clear guidance.

At Basys, we take a proactive approach:

We reach out to you directly—by phone and email

We walk you through the PCI questionnaire, step-by-step

We answer your questions in real time and explain requirements clearly

It usually takes just 15 minutes to get it done
